

Adrianna found herself in a situation she never imagined. Without insurance and facing a serious health issue, she felt lost and scared.

“After I lost my job I was without health insurance and went two years without diabetes care, which caused serious complications to my health and eye,” Adrianna shared.

That is when she discovered Center for Healing & Hope. “It is excellent,” she said. “It has been a great benefit, thank God they are here. It is a great help with medications, medical care, and even food,” she continued.

At Center for Healing & Hope it was explained to Adrianna that she needed a procedure to correct the problem with her eye before it got worse. While Center for Healing & Hope does not offer the procedure, the team quickly got on the phone with a vision referral partner and were able to get Adrianna an appointment the same day! Not only that, but the team at CHH made sure the procedure would be covered under one of the referral partner’s charitable care programs, ensuring that Adrianna would not only be eligible for the procedure, but that she could afford to see it through.

“I was about to lose my sight, and yesterday I had the surgery to save my right eye,” she said at a follow up appointment at CHH. “Thanks to the vision center referral I was able to get the help I needed. I am very grateful to the vision center and to Center for Healing & Hope. Without Center for Healing & Hope there would be no medical solution for my health problems. Thank you to everyone here. They are like angels to us.”
